

West Point Cyber Team Visits Local High School

CPT Kranch explaining the mission of the team to the Saint Luke's students

Representatives from the West Point Cyber team traveled to Saint Luke's High School to speak at their monthly "Lunch and Lead" event on the challenges of being a technical leader. Cadets Mason Adam ('18), Joe Bianchi ('20), and Tyeson Sessions ('20) along with Assistant Coach CPT Michael Kranch traveled to the school last Thursday. The team first ate lunch with several of the high school students including two incoming members of the class of 2021. Following lunch, the team gave a presentation on the importance of communication and diversity in building a cohesive and competent technical team. This event was a valuable outreach experience for the cadets allowing them to share the amazing Cyber opportunities afforded to cadets at the Academy while stressing the importance of good cyber security.
